

LESSON **4-5** **Technology Lab Recording Sheet** p. 270
Interpret Scatter Plots and Trend Lines

Try This

- The table shows the price of a stock over an 8-month period. Graph a scatter plot of the given data.

Month	1	2	3	4	5	6	7	8
Price (\$)	32	35	37	41	46	50	54	59

Draw the trend line. Then predict what the price of one share of stock will be in the 12th month.
