

Materials

- 2 pieces of card stock (5¼ by 12 in.)
- 21 strips of colored paper (1½ by 5½ in.)
- glue
- markers

It's in the Bag!

PROJECT Percent Strips

This colorful booklet holds questions and answers about percents.

Directions

- 1 Fold one piece of card stock in half. Cut along the crease to make two rectangles that are each 5¼ inches by 6 inches. You will use these later as covers for your booklet.
- 2 On the other piece of card stock, make accordion folds about ¾-inch wide. When you are done, there should be 16 panels. These panels will be the pages of your booklet. **Figure A**
- 3 Fold up the accordion strip. Glue the covers to the top and bottom panels of the strip. **Figure B**
- 4 Open the front cover. Glue a strip of colored paper to the top and bottom of the first page. **Figure C**
- 5 Turn the page. Glue a strip of colored paper to the back of the first page between the other two strips. **Figure D**
- 6 Glue strips to the other pages in the same way.

Putting the Math into Action

Write a question about percents on the front of each strip. Write the answer on the back. Trade books with another student and put your knowledge of percents to the test.
